

# 謝東霖

FrontEnd Developer

don.shieh@gmail.com  
<https://donrsh.github.io/profile>

## Education

2008.09 - 2012.08

**National Cheng Kung University, Tainan, Taiwan**  
**Bachelor of Science, Mathematics**

## Work Experiences

2016.04 - 2017.08

**FrontEnd Developer at Kdan Mobile**

- Maintain an AngularJS Project
- React integration with Ruby on Rails
- Code splitting based on routes with Webpack2
- Integration with Stripe for customized checkout flow

## Work Tools & Environment

**OS - Mac OSX**

**Version Control - Git (mostly in command line)**

**Editor: VSCode**

## Skills

### CSS-related

- CSS3 and flex-box layout
- Sass
- RWD - media query and cross-devices image resource management by HTML5 `srcset` and `<picture>` element feature
- PostCSS - I use `cssnext` and `postcss-import` to implement css modularization of variables, fonts and breakpoints in webpack-based workflow
- **styled-components** - another solution for styling components. It provides more flexibility, especially those React nodes as children of other components.

### JS-related

- **React**
  - **React Router** for SPA
  - HOC (Higher Order Component) Pattern for automatic jobs
  - **Recompose** for some common HOC use case
- **Redux**
  - **Redux-Promise / Redux-Saga** for grouping store operations
- ES2015+
- **jQuery**
